# ATELIER

Il concept nasce con una struttura principale in acciaio, nero opaco o cromata, abbinata alle diverse finiture e colorazioni dei mobili, ed elementi di arricchimento come il pouf, gli specchi tra cui quello ingranditore dedicato al trucco, il contenitore in pelle ed il cestino per accessori; questi ultimi fanno parte degli optional aggiuntivi che vanno ad integrare l'estetica e il concetto finale. Caratteristica singolare e preziosa di questo mobile è che lo spazio dedicato al lavabo non è vincolato ad una linea né ad una misura obbligate, infatti l'ingombro predisposto può ospitare lavabi che vanno dai 50 ai 75 cm, a soddisfare così gusto ed esigenze dell'utente finale.

The concept was born with a main structure in steel, matt black or chromed, combined with the different finishes and colors of the furniture as well as enriching elements such as the pouf, the mirrors including the magnifying mirror dedicated to make-up, the leather container and the basket for accessories; the latter are all part of the additional options that integrate the aesthetics and the final concept. A singular and precious feature of this concept is that the space dedicated to the washbasin does not have a specific dimension, in fact the prearranged space can accommodate washbasins ranging from 50cm to 75 cm, thus satisfying the taste and needs of the final user.

### MOBILE TRATTO:

Elegante e raffinato il legno Wengé caratterizza i mobili da bagno freestanding. Si ha la possibilità di avere diverse combinazioni di colore, scelti tra colori trend del momento e che non risulteranno mai banali anche negli anni a seguire. La maniglia fina e lineare ispira il nome della collezione. Le misure dei mobili Tratto sono 60, 75 cm ed ospitano tutti i lavabi monoforo della serie tranne il lavabo da 80 e la consolle da 100 cm.

### TRATTO FURNITURE:

FREESTANDING :: CENTRO STANZA

I lavabi freestanding sono la soluzione più pratica: grazie alla struttura che appoggia a terra, non necessita di particolari lavori per la collocazione né di adeguamenti negli impianti di un bagno tradizionale. Particolare da non sottovalutare il lavabo freestanding è anche il tipo di lavandino con cui i designer hanno dato spazio alla loro immaginazione.

Freestanding Washbasins are the most practical solution: thanks to the structure that rests on the ground, it does not need any particular work for the placement or adjustments in the facilities of a traditional bathroom. A particular not to be underestimated: the freestanding is the sink type used by the designers to give space to their imagination.

I nuovi piatti doccia in ceramica H3 sono realizzati con un'esclusiva tecnologia capace di offrire lo stesso risultato estetico della resina utilizzando la ceramica, a noi tanto cara, ovvero il materiale più duraturo e affidabile nel tempo per eccellenza.

L'innovativo processo tecnologico ad alta pressione con stampi in resina consente di ottenere un prodotto di elevatissima qualità utilizzando solo materiali naturali, in contrapposizione netta con i compositi sintetici e le resine che non riescono, per propria natura, a garantire performance consistenti nel tempo.

The new H3 ceramic shower trays are made with an exclusive technology, able to offer the same aesthetic result than resin using ceramics, that is the most durable and reliable material over time par excellence.

The innovative high pressure technological process with resin molds allows you to get a highest quality product, using only natural materials, in contrast with synthetic composites and resins that can not, by their nature, guarantee consistent performance over time.

# PIATTI DOCCIA KEY ::

Un elemento di grande eleganza nella sua semplicità e pulizia formale, minimale nell'aspetto, deciso nel materiale. Lo smalto ceramico con effetto antibatterico rende particolarmente igienico il piatto doccia, facile da pulire (anti-macchia, testato UNI 4543, blu dimetilene, inchiostro, tintura di iodio e permanganato di potassio) e conferisce caratteristiche nettamente superiori in termini di durata e resistenza rispetto alle superfici in resina (che contrariamente sono porose, e potrebbero tendere ad assorbire agenti esterni).

An element of great elegance in its simplicity and formal cleanliness, minimal in appearance, decisive in the material. Ceramic enamel with antibacterial effect makes the shower tray particularly hygienic, easy to clean (anti-stain, tested UNI 4543, dimethylene blue, ink, tincture of iodine and potassium permanganate) and gives it superior characteristics in terms of durability and strength compared to resin surfaces (which are porous and may absorb external agents).

## OLY-CER - PORCELLANA SANITARIA PER SANITARI

Miscela di argilla bianca, caolino, quarzo e feldspato accuratamente selezionati, i migliori reperibili sul mercato. La miscela viene lavorata fino ad assumere la consistenza di massa ceramica atta a formare il corpo del manufatto. Il manufatto viene smaltato a crudo e sottoposto a monocottura in forni fino a raggiungere una temperatura di 1250°C. Dopo la cottura la massa ceramica si presenta bianca compatta, con un assorbimento inferiore a 0,5%, inattaccabile dagli acidi e dagli alcali, secondo le vigenti normative UNI. Nel corso della fase produttiva tutti i sanitari Olympia sono sottoposti a controlli sulla lavorazione degli impasti e degli smalti, sulla regolarità di formatura, sulla funzionalità e sulla robustezza (con prove di carico fino a 150 kg. per i lavabi e fino a 400 kg. per vasi e bidet). Lo **SMALTO OLY-SMALT** è costituito da caolino, quarzo, feldspato, silicato di zirconio e ossido di stagno. Durante la fase di monocottura fa unico corpo con il supporto ceramico del singolo apparecchio sanitario. Se colorato, contiene ossidi metallici e pigmenti. **OLY-CLAY** - Gres fine porcellanato (fine fire-clay) per lavabi arredo e piatti doccia. Miscela di chamotte, argilla bianca, caolino, quarzo e feldspato accuratamente selezionati, i migliori reperibili sul mercato. La miscela viene lavorata fino ad assumere la consistenza di massa ceramica atta a formare il corpo del manufatto. Il manufatto viene ingobbato poi smaltato a crudo e sottoposto a monocottura in forni fino a raggiungere una temperatura di 1250°C. Dopo la cottura la massa ceramica si presenta a grana media fine, con un assorbimento inferiore al 9%. L'**INGOBBIO** ha gli stessi componenti usati per la massa ceramica. Was born in Brescia in 1963 under the sign of Pisces. In 1988 he graduated in architecture at Politecnico di Milano with Achille Castiglioni as a speaker (and teacher unmatched). After three years abroad, he returned to Italy and devoted himself mainly to developing projects for the design of furniture, complement, lighting, bathroom, office, objects and early childhood, working in addition to exhibitions, theatrical choreography, art direction, design coordination, graphics and communication. He doesn't like the absolutism and the indistructible certainties, he loves to look at things with always different eyes to be in tune with them, he prefers to speak softly and, above all, listen. Like all the designers, more or less, he put aside the minimum necessary equipment of prizes and awards, he has given lectures, workshops, he served on juries and so on.
